

**CORRIGENDUM / ADDENDUM**

**DATED 10/06/2009**

1. In **Section – I** under **‘Project Details and Specification’**, the word namely **‘Run Way Speed’** may be read as **‘Run Away Speed’**.
2. The material for turbine may be of Stainless Nickel Chromium Steel or Stainless Carbon Steel.
3. In Part-I (Technical and Commercial Bid), the bidders are required to furnish the general specifications and description of turbines, generator, governor, panel board, protection system, metering system etc. (along with Commercial offer) which they intend to supply and install.  
Project-wise details and specifications should also be given separately in addition to general specifications and descriptions. However, the same may or may not be given along with the Price offer in Part-II.
